Process Evaluation of the CHED K to 12 Adjustment Assistance Program

1. Background and Rationale

The CHED established the K to 12 Transition Program in late 2015, with the goals of mitigating adverse impacts on labor, and upgrading the qualifications of faculty. The Program effectively leverages the transition period to invest in the future of higher education, particularly through the following activities: (a) program for faculty and staff transferring to SHS; (b) graduate studies; (c) faculty development grants; (d) staff development grants, (e) innovation grants for HEIs, (f) materials development and training; and (g) program for small HEIs in collaboration with TESDA and DepEd.

For faculty and staff who will experience a lower workload during the transition to K to 12, the CHED designed the following development packages: (1) Scholarships for graduate studies and short-term training for professional advancement, (2) Development grants for faculty and staff, and (3) Innovation grants for institutions. The Program targets to give 15,000 scholarships (8,000 master's degrees and 7,000 doctorate degrees) to HEI personnel, while those who are not able to study full-time may avail of grants for activities such as retooling, research, community service, and industry immersion. Innovation grants are also available for institutions for funding the upgrading of their programs through international and industry linkages, research, and development of priority or niche programs.

The Philippine Institute for Development Studies (PIDS) seeks to procure the consultancy services of a Consultant as Research Associate to assist the Project Director and Co-Principal Investigator in the supervision and conduct of the process evaluation study.
