August 2021

Abstract

Executive Order No. 27 Series of 2017 mandated all government agencies and instrumentalities, including all local government units (LGUs), to implement the Philippine Development Plan (PDP) and Public Investment Program (PIP) for the period 2017-2022. This triggered the PDP localization efforts of the Department of the Interior and Local Government (DILG) and National Economic Development Authority (NEDA) in 2017. Aimed at aligning local development plans with the PDP, the exercise produced results matrices (RMs) for provinces and National Capital Region (NCR) LGUs. But even beyond the alignment of development plans, the RMs show how: (1) LGUs contribute to national development through their programs and projects; and, (2) informs oversight agencies of LGU priorities and needs.

This study reviews how recent efforts to ensure the alignment of provincial/NCR LGUs to national development goals fared. How effective were recent PDP and PDP results matrices (PDP/RM) localization efforts? This study used a mixed methods approach, sequential parallel analysis and process evaluation focusing primarily on summarizing and evaluating the drafted RMs and engaging in key informant interviews aimed at gathering perceptions on the conduct of the PDP localization efforts and suggestions for improvements.

The summarized LGU RMs of the report show how these are a powerful tool that could help identify priority areas, monitor progress, collectively inform strategic investments, and surface areas that LGUs may need oversight support from the national government. The PDP localization exercise was also well received by interviewed local officials helping them to recognize their contribution to national development. Moving forward, there is a need to strengthen information and education campaign, strengthen human resource capacities, and make indicator data more available. Finally, this exercise should be included in the broader thrust of being able to link plans and investment programs to outputs and their contribution to national outcomes.

Keywords: local governance, sub-national governance, local monitoring and evaluation, local planning – budgeting, local outputs, local development outcomes

Assessment of the Provincial/ NCR Local Government Unit Result Matrices (P/NCR LGU RMS) in the Localization of the Philippine Development Plan (PDP) 2017-2022 and the Sustainable Development Goals (SDGs)

Charlotte Justine Diokno-Sicat, Angel Faye G. Castillo and Ricxie B. Maddawin*

1. Introduction

1.1. Rationale

Executive Order No. 27 Series of 2017¹ mandated all government agencies and instrumentalities, including all local government units (LGUs), to implement the Philippine Development Plan (PDP) and Public Investment Program (PIP) for the period 2017-2022. The entire government machinery anchored its efforts towards the attainment of *Ambisyon Natin 2040* and likewise advocated and solicited support for the *2030 Agenda for Sustainable Development* embodied in the 17 Sustainable Development Goals (SDGs).

In 2017, the Department of the Interior and Local Government (DILG) pursued various policies and initiatives in partnership with other concerned agencies for the localization of the PDP. Field level activities were undertaken to increase awareness, strengthen functionality of local development councils (LDCs) to operationalize localization activities in 2018 (DILG 2017).

In the following year, the 2018 General Appropriations Act (GAA) imposed the condition that the relevant portion of the DILG budget be used to ensure that all Local Development Investment Programs (LDIPs) are aligned with the Results Matrix (RM) of the PDP. 2018 GAA Special Provision No. 2, acknowledged the substantive impact of aligning LGU plans and budgets for the implementation of interventions contributing to the attainment of the PDP with the collective resources of over 1,634 provinces, cities and municipalities.

As a result, the DILG and the National Economic Development Authority (NEDA) introduced the Provincial and National Capital Region (NCR) LGUs Results Matrices (RMs) as an instrument/mechanism to “enable” and “approximate the extent of alignment” of LDIPs to PDP RMs (DILG-NEDA 2018). By design, provinces were expected to play a pivotal role in linking city/municipal performance indicators and targets to regional ones contained in the Regional Development Plan RMs which NEDA regional offices draft to be aligned with the national PDP RMs. Provincial RMs were envisioned to include the collective targets and commitments of the province, its component cities and municipalities and, possibly, those of highly urbanized cities (HUCs) and independent component cities (ICCs). The formulation of city/municipal level RMs (except for those in the NCR) was not pursued given the difficulty of establishing standardized city/municipal level indicators with the unavailability of data at the city/municipal level.

The authors would like to acknowledge the excellent assistance of Ms. Joana V. Camacho Senior Research Specialist (consultant).

¹ Directing All Government Agencies and Instrumentalities, Including Local Government Units, to Implement the Philippine Development Plan and Public Investment Program for the Period 2017-2022

The PDP localization efforts were continued through 2019, enhanced with the requirement to submit accomplishment reports to display how these RMs could be used for monitoring and evaluation. In addition, the DILG introduced a tool, the Bureau of Local Government Development (BLGD) RM Code, which is assigned to every program, project and activity (PPA) in the LGU's local development investment program (LDIP). This makes it easy to identify LGU PPA's contribution to the PDP and national development. The next step planned by the DILG is the digitalization of the LDIP.

Much effort has been put into this exercise. While the DILG, in partnership with NEDA, PSA and PSRTI endeavored to adopt the *P/NCR LGU RMs* anchored on the exercise of provincial oversight, there is a need to take stock of what has been undertaken to include policies, strategies and instruments introduced; and the results of such initiatives to assess its effectiveness in order to inform decisions on further institutionalization and in future undertakings.

1.2. Economic justification and international experience in national and local government alignment of development priorities.

One of the main economic justifications for adopting a decentralized or federal form of government is that local government officials know what their constituents and localities need better than national government officials and, therefore, are in a better position to provide the appropriate/relevant services (Tiebout 1956). This concept of subsidiarity prescribes assigning expenditure responsibilities to the lowest level of government where benefits are concentrated, therefore, improving the efficiency in the use of public money since spending would be based on local needs and preferences (Bahl and Bird 2018, Stiglitz and Rosengard 2015).

In the Philippines, in order for local governments to be able to provide these services, they have the mandate to collect revenues and are entitled to an intergovernmental fiscal transfer called the Internal Revenue Allotment (IRA). In reality, however, local governments are heavily dependent on the IRA grant and have low revenue effort either because of limited local revenue sources or the lack of political will to raise local revenues because of unpopularity with voters or both (Diokno-Sicat 2019).

To fill the gap, the national government provides support to local governments through programs that target the provision of devolved infrastructure services. These programs have also been used as a means to ensure that national government priorities are linked by identifying critical infrastructure these funds can be used for by the local government. This is in line with the LGC policy declaring local governments as partners in the attainment of national goals.² Though these programs have been in place for decades, these may be discontinued with the implementation of the Mandanas Supreme Court ruling that will increase the revenue base on which IRA is computed. A main concern of policymakers now is how LGUs plan to prioritize and spend the increased grants to be received, especially since LGUs are the drivers of local economic growth.

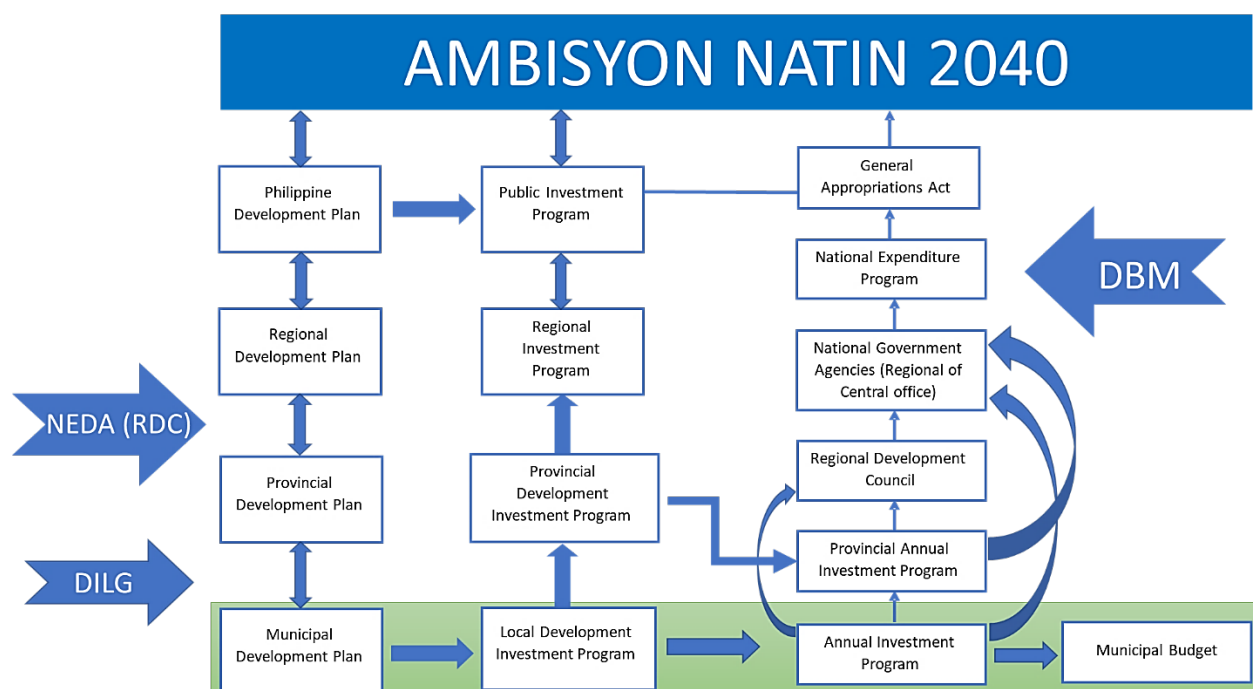

A recent study by Sicat et.al. (2019) assessed the current Philippine local planning-budgeting framework vis-à-vis national government planning. It found the need to strengthen the linkage

² Sec. 2. Republic Act No. 7160

between city and municipal governments and provincial governments as well as that of provincial governments with RDCs local planning process in the Philippines.

Figure 1 maps out the local planning and budgeting framework. The overarching long-term vision of the Philippine government is the *Ambisyon Natin 2040*. The current medium-term administration-based Philippine Development Plan (PDP) was drafted anchored on this vision and completed through a consultative/iterative planning process as can be seen in the first column of Figure 1 (Sicat, Mariano, et al. 2019). National government priorities and development agenda were presented in various fora to gather feedback and encourage alignment with local plans. NEDA, through the Regional Development Council (RDC) and DILG are the two agencies responsible for the alignment of local plans to national development plans.

Figure 1. The Integrated National and Local Planning Budgeting Framework

Source: Sicat et.al. (2019)

The second column in Figure 1 shows a similar vertical linkage of development planning but for investment programs. Ideally, the investment programs of lower levels of government should be incorporated in those of higher levels of government (NEDA-ADB 2007).

The third column, this shows the relationship of annual investment programs and the national budget. Insufficient local funding of AIPs makes LGUs resort to request financing, primarily from the national government. The evidence shows that municipalities that receive national government grant-type funding from national government agencies do so more often by directly requesting from these, less so through the RDCs (Sicat, Adaro, et al. 2020). The shaded box or the last row in Figure 1 that shows the local planning-budgeting flow.

The abovementioned recent efforts to localizing the Philippine Development Plan 2017-2022 and ensuring its integration and adoption of its priorities such as adapted SDGs in provincial plans have also been similarly done internationally as discussed below.

Since the introduction of SDGs, many countries have committed to adapting these goals in their local communities. Different strategies or techniques were utilized to contextualize the SDGs to their countries. The Global Taskforce of Local and Regional Governments (GTF) released a report tackling the efforts of different countries to localize the SDGs at the subnational or local government level (GTF 2016). It was highlighted in the discussion that local governments play a very crucial role in the fulfillment of the SDGs and many countries have recognized this, thus ensure that local governments and other stakeholders understand and own these goals as well as the goals and plans of the National Government (NG). The Government of Belarus developed the Belarus Express in 2015, which creatively introduces the SDGs to the community through a train journey. In Spain, the SDGs and NG plans were embedded to their education system. Countries like Aberdeen, South Africa, Albania, and Ecuador prioritized a participatory approach wherein the local communities and stakeholders actively participate in the process of definition of the NG plans and actions that are in lined with the SDGs. Netherlands did a similar process. Through a series of campaign, the local government was able to participate in examining and aligning their own policies with the SDGs. Stakeholders all over the country was also able to identify their needs and “wish” of what sustainable future should be. Lastly, the campaign was taken to the national ministries and large companies for negotiation and advocacy. Columbia, on the other hand, created the High-level Interinstitutional Commission for the Preparation and Effective Implementation of the Post-2015 Development Agenda which aimed to monitor and implement public policies and programs relating to SDGs.

Aside from aligning the plans and programs of these countries to the SDGs, it is also important that resources are also allocated towards achieving these goals, especially at the subnational government (GTF 2016). In 2013, Zen also conducted an analysis of the alignment of the national-regional planning and budgeting system in Indonesia which highlighted that the budget should always be aligned with the plans. This is similar to the findings of Diokno-Sicat, et al. (2020) who did a study on the planning and budgeting framework of the Philippines, and additionally found that the local government development plans must find its way to the national development plans, which is not always the case. Moreover, Zen (2013) recommended having proper and concrete indicators to properly align and monitor if the plans and budget of the local government is aligned with the national goals. These measures of alignment must be set every three years to still allow for flexibility in local governance.

In Indonesia, the UNDP (forthcoming) listed their good practices in localizing the SDGs in their country. First, the government developed the National Medium-Term Development Plan (RPJMN) 2015-2019 which were all aligned to the SDG targets. Then, all government plans, activities, and programs are mandated to be aligned with the national development plan. Indonesia also has an established system of engaging the public’s participation in the planning and budgeting process which involves negotiating, reconciling and harmonizing differences and coming up with one decision. The localization program was successfully implemented in Riau Province, one of the pilot districts, and during its first year of implementation, the program already made promising results.

1.3. Policy Question and Objectives of the Study

The main objective of this study is to determine how recent efforts to ensure the alignment and of provincial/NCR LGUs to national development goals fared. This requires examining how PDP localization efforts were implemented and if these resulted in aligned priorities that could be monitored.

The overall policy question is: How effective were recent PDP and PDP results matrices (PDP/RM) localization efforts? This requires answering the following questions:

- Were the objectives of the PDP localization efforts met?
- Have these efforts resulted in aligned provincial/city RMs with regional development plan RMs?
- Do the resultant provincial/city RMs contain information, such as baseline and target indicators and timelines needed to be able to monitor progress and development in priority areas in each region?

According to DILG-NEDA Joint Memorandum Circular No. 1 series of 2018, the purpose and objectives of the PDP Localization exercise were:

“The series of activities under this Joint Memorandum Circular (JMC) upholds the principle of decentralization in the Local Government Code (LGC) and strengthens the vertical linkages across the different levels governments in development planning and budgeting. This JMC highlights the following:

- Adoption of a geographic-based perspective in planning and investment programming by provinces that encompasses cities and municipalities within its administrative boundaries to include highly urbanized cities (HUCs) and independent component cities (ICCs) within its periphery;
- Exercise of provincial oversight vis-a-vis planning, implementation and monitoring;
- Strengthening of provincial-city/municipality interface and dialogue; and,
- Strengthening province, city and municipality database management system.

Specifically, this JMC intends to provide guidance on the institutionalization of the following:

- Formulation of Provincial RMs that entails determination of applicable provincial and city/municipal-level indicators, baselines and targets based on established regional RMs/SDGs and in accordance with the respective local development plans;
- Formulation of RMs of cities and municipalities under the National Capital Region (NCR);
- Ensuring LGU commitment to implement PPAs and allocate budget for the achievement of targets; and,

Annual assessment of the contributions of cities, municipalities, and provinces in the attainment of PDP-targeted priorities and outcomes and, consequently, achievement of the PDP and to the most practical extent, the SDGs.”

As discussed above, economic theory suggests that a decentralized form of government would allow more efficient use of public money since local government officials can identify their own expenditure and revenue-raising priorities rather than these being dictated by a central government. At the same time, though PDP localization efforts may be perceived as encroaching on local autonomy, the resultant local development plans and results matrices are useful instruments to comprehensively monitor LGU contributions to national development and identify areas that require more investment and strengthened oversight.

2. Scope, Data and Methodology

This study used a mixed methods approach, sequential parallel analysis and process evaluation. Through desk review and applicable methodology/ies, pertinent policies, operational mechanisms, instruments and outputs/results of localization activities implemented from 2017-2019 were examined. These were the basis of the recommendations to further promote attainment of:

- (i) The alignment of LDIPs with PDP RMs, one of the objectives of JMC No. 1 series of 2018; and,
- (ii) Quantifying LGU contributions in the attainment of national goals and strategic priorities through regional development plans (RDP) consistent with the PDP 2017-2022 and the SDGs.

Virtual Key Informant Interviews (KIIs) with members of national government agencies involved in the PDP localization efforts (e.g. DILG, Department of Budget and Management, Department of Finance-Bureau of Local Government Finance) and those directly involved in the PDP localization efforts, such as the DILG Regional and Field Offices, contributed to the results of the study.

The KIIs provided inputs to the PDP localization process evaluation. The analysis included documenting operational strategies and approaches of different LGUs regarding: (1) policies/guidelines issued; (2) LGU engagement strategy and policy execution; and, (3) the drafting of P/NCR LGU RMs as the operational instrument to establish LDIP -PDP RM alignment.

The main part of the report established statistics based on the summary of the P/NCR RM indicators (Table 1). These summary statistics were estimated by: (1) encoding the RM indicators by province; (2) counting these for each of the PDP chapters; and, (3) summing provincial totals by chapter to get regional figures. This would, however, double count some indicators present across provinces. To address this, the compromise was to instead report average indicators across provinces for the regional summaries.

As can be seen in Table 1, the first four indicators are administrative ones, pertaining to compliance of filling up required forms on drafting RMs and assessing accomplishments. The last four indicators are the focus of this draft to provide a picture of the PDP and SDG priorities relevant to specific regions and/or provinces. The qualitative data was encoded and

systematically processed by counting the identified provincial/NCR RM indicators. Not all provinces/NCR LGUs filled up the DILG/NEDA RM templates completely, so depending on what was reported in the Provincial/NCR RMs, indicators that were aligned with Regional Development Plans (RDPs) and Sustainable Development Goals (SDGs) were counted and summarized as is. Finally, the presence of baseline and target indicators defined in the provincial/NCR RMs were also summarized. The combined results will show how the PDP localization efforts were effective in terms of compliance, will surface priority areas of different regions and depict how useful the indicators are for monitoring and evaluation.

Table 1. Proposed PDP Localization indicators

Indicators	Definition/Source of basic data
Number and proportion of P/NCR LGUs that accomplished the P/NCR Results matrices assessment form	DILG
Number and proportion of P/NCR LGUs that accomplished this form	DILG
Number and proportion of SDG indicators in provincial RMs	Shows the proportion of indicators aligned with the SDGs per province which implies that certain SDGs are priorities in the provinces/regions. This will also allow oversight agencies to “customize” oversight and guidance for different areas rather than one-size fits all policy.
Number and proportion of provincial RM indicators with baseline information	Shows the proportion of priority areas and their corresponding PDP-RM indicators with identified baseline per province. This is an important source of information needed to measure progress with interventions.
Number and proportion of provincial RM indicators with set targets	Shows the proportion of priority areas and their corresponding PDP-RM indicators with identified targets per province. This is an important source of information needed to measure progress with interventions.
The quality of baseline and target indicators were included in the provincial RMs.	If there are indicators specified for baseline and targets, is the manner by which these are defined useful in evaluating progress in these interventions?
Number and proportion of P/NCR LGUs that accomplished the P/NCR Results matrices accomplishment form	DILG
Number and proportion of P/NCR LGUs that accomplished the Recommended PPAs based on FY 2018 RM performance form	DILG

In the assessment of the accomplishment of committed targets for FY 2018 and FY 2019, the focus is: (1) the attainment of committed provincial targets for each year and, to the extent possible, (2) a comparative performance by chapter across both years, provinces or NCR LGUs.

All these results will allow an overall assessment of the effectiveness and appropriateness of policies, operational approaches adopted and instrument/s used (i.e. the PRM/NCR LGU RMs) and would be the basis for recommendations on institutionalization and/or further enhancements of the PDP Localization effort.

3. Analysis of the provincial and city results matrices

This section presents an analysis of the provincial/NCR and regional results matrices. The creation of these RMs was couched on the premise of alignment with the RDP, a regionalized version of the PDP. This gave provinces the opportunity to see their contribution to national development. At the same time, from the point of view of national government oversight agencies, the provincial RMs surface priority areas of both the contribution of these local governments to national development as well as where national government support could be directed.

Table 2 shows the regional summary of provincial/NCR RM indicators. The reported provincial RM indicators were grouped into the following categories: (1) count of indicators; (2) count of indicators aligned with Sustainable Development Goals; (3) count of baseline data of indicators; and, (4) count of target data of indicators. The regional summaries were computed as the sum of indicators by PDP chapter across all provinces in the region, and therefore, could be overstated with duplication of indicators that are the same across provinces.³ To better approximate, these sums were averaged across the number of provinces that submitted RMs to better visualize the prioritization of categories. These regional summaries provide insight on regional priorities and the inferred availability of data and indicators for monitoring progress through baseline and target indicators.

Table 2. Regional average of provincial results matrix indicators

Region	Count				In percent		
	Number of indicators	Number of indicators aligned with SDG	Number of indicators with baseline	Number of indicators with targets	Number of indicators aligned with SDG	Number of indicators with baseline	Number of indicators with targets
I	210	38	131	110	18%	62%	52%
II	255	141	185	165	55%	73%	65%
III	181	94	141	110	52%	78%	61%
IV-A	391	161	333	281	41%	85%	72%
IV-B	258	100	247	241	39%	96%	93%
V	278	93	235	180	33%	85%	65%
VI	442	58	267	225	13%	60%	51%
VII	260	88	238	156	34%	92%	60%

³An important observation which could also contribute to the figures being overstated is that the number of SDG aligned indicators could be overstated because of associating local indicators with the 151 Tier 1 SDG indicators (of which there are 68 that could be disaggregated to the regional level and 33 to the provincial level) even if these are not the actual indicators but similar. In addition, the PSA developed 98 core regional indicators of which 78 could be disaggregated to the provincial level. Finally, provinces may also have their own indicators that they may also associate with SDGs. These reasons could explain the large number of SDG indicators.

Region	Count				In percent		
	Number of indicators	Number of indicators aligned with SDG	Number of indicators with baseline	Number of indicators with targets	Number of indicators aligned with SDG	Number of indicators with baseline	Number of indicators with targets
VIII	528	162	500	452	31%	95%	86%
IX	431	157	312	270	36%	72%	63%
X	248	109	220	133	44%	89%	54%
XI	189	81	182	162	43%	96%	86%
XII	336	231	243	175	69%	72%	52%
XIII	394	203	297	313	52%	75%	79%
CAR	695	193	641	466	28%	92%	67%
NCR	106	11	102	70	10%	96%	66%
Average (excl. NCR)	340	127	278	229	37%	82%	67%

The summary statistics show that, on average,⁴ 37% of the reported indicators are aligned with SDGs primarily in the PDP chapters on: (1) human capital development (Ch. 10); (2) economic opportunities in agriculture and fisheries (Ch. 7); (3) safe, efficient, reliable, cost-effective and sustainable infrastructure facilities and services (Ch. 19); (4) ecological integrity and socioeconomic conditions of communities improved (Ch. 20); and, (5) vulnerability of individuals and families reduced.

Apart from being able to identify indicators for priority areas, it is important for monitoring purposes to have baseline and target data to measure progress. For baseline data, the average excluding NCR, indicates that 82% of indicators have baseline data. This may however be overstated for some regions because of incomplete accomplishment of the RM templates/forms. There is a column in the DILG-NEDA RM template labeled ‘indicator source’ that LGUs should have filled up along with baseline and target indicators. The implication of leaving said column blank is that the count of indicators would be less than the number of indicators with baseline information, explaining why some regions have more than 100% baseline indicators than coded indicators.⁵

For target data, the average excluding NCR is 67%, but may also be overstated for the same reason given for baseline data. What could be inferred is that there are more baseline than target data in the current provincial RMs. Since one of the objectives of the exercise is to strengthen LGU commitment, it would be good to highlight the importance of LGUs committing to targets. The rest of this section presents the regional summaries of provincial RM indicators that were defined based on the PDP. The Eastern Visayas region (Region VIII) defined their own chapters and, therefore, is reported using the matched PDP chapters (See Tables 43 to 46 of Annex A).

⁴ NCR was excluded in the average because of non-reporting of the indicator source as should have been done according to the guidelines.

⁵ Moving forward, it would be good to remind LGUs to accomplish forms completely.

3.1. Region I

With a total of 210 indicators for Region 1, 18% are aligned with SDGs, 63% have baseline figures and 53% targets (Table 3). The bulk of indicators pertain to human capital development (Ch. 10) with 20% of indicators being here. This chapter also has the most number of indicators aligned with SDGs at 25% and the most number with baseline and targets.

Economic opportunities in industry and services (Ch. 9) and safe, efficient, reliable, cost-effective and sustainable infrastructure facilities and services (Ch. 19), are the next two PDP chapters that Region I has the most number of indicators.

The chapters with the most number of indicators aligned with the SDGs are economic opportunities in agriculture and fisheries (Ch. 8) and, safe, efficient, reliable and cost-effective and sustainable infrastructure facilities and services used by the population (Ch. 19).

Table 3. Region I summary of provincial RM indicators

PDP/RDP Chapters		Number of reported indicators		Number of reported indicators aligned with SDGs		Number of reported indicators with baseline data		Number of reported indicators with annual targets	
		Count	% of total	Count	% of total	Count	% of total	Count	% of total
Ch 5	People centered, clean, efficient, and effective governance ensured	15	7%	4	23%	14	95%	14	93%
Ch 6	Swift and fair administration of justice	4	2%	0	0%	4	94%	4	94%
Ch 7	Philippine culture and values promoted	6	3%	1	8%	6	96%	5	75%
Ch 8	Economic opportunities in agriculture and fisheries expanded	20	10%	6	30%	13	65%	12	57%
Ch 9	Economic opportunities in industry and services expanded	24	11%	3	13%	13	52%	9	36%
Ch 10	Human capital development accelerated	42	20%	10	23%	27	64%	21	49%
Ch 11	Vulnerability of individuals and families reduced	6	3%	1	22%	3	57%	3	57%
Ch 12	Safe and secure communities built	6	3%	2	24%	2	36%	2	32%

PDP/RDP Chapters		Number of reported indicators		Number of reported indicators aligned with SDGs		Number of reported indicators with baseline data		Number of reported indicators with annual targets	
		Count	% of total	Count	% of total	Count	% of total	Count	% of total
Ch 13	Gains from demographic dividend maximized	5	2%	1	28%	2	39%	2	33%

3.2. Region II

With a total number of 255 reported indicators, 55% are aligned with SDGs, 73% have baseline data with 65% having targets (Table 4). The top 3 PDP Chapters with indicators are:

1. Ch 10 Human capital development accelerated

2. Ch. 19 Safe, efficient, reliable, cost-effective and sustainable infrastructure facilities and services are used by the population
3. Ch. 8 Economic opportunities in agriculture and fisheries
- The top 3 chapters with SDG aligned indicators:
 1. Ch. 10 Human capital development accelerated
 2. Ch. 19 Safe, efficient, reliable, cost-effective and sustainable infrastructure facilities and services are used by the population
 3. Ch. 20 Ecological integrity ensured and socioeconomic condition of communities improved
- In terms of the top 3 chapters with most number of baseline and target data
 1. Ch. 10 Human capital development accelerated
 2. Ch. 8 Economic opportunities in agriculture and fisheries
 3. Ch. 20 Ecological integrity ensured and socioeconomic condition of communities improved and Ch. 11 vulnerability of individuals and families reduced

Table 4. Region II summary of provincial RM indicators

PDP/RDP Chapters		Number of reported indicators		Number of reported indicators aligned with SDGs		Number of reported indicators with baseline data		Number of reported indicators with annual targets	
		Count	% of total	Count	% of total	Count	% of total	Count	% of total

3.3. *Region III*

With a total number of 181 reported indicators, 52% are aligned with SDGs, 78% have baseline data with 61% having targets (Table 5). The reason that there appear to be more baseline and target data than indicators could possibly be because of incorrect/incomplete filling up of the RM template by leaving the ‘indicator source’ column blank. The top 3 PDP Chapters with indicators are:

1. Ch. 10 Human capital development accelerated
 2. Ch. 8 Economic opportunities in agriculture and fisheries
 3. Ch. 11 Vulnerability of individuals and families reduced
 4. Ch. 20 Ecological integrity ensured and socioeconomic condition of communities improved
- The top 3 chapters with SDG aligned indicators:
 1. Ch. 10 Human capital development accelerated
 2. Ch. 20 Ecological integrity ensured and socioeconomic condition of communities improved
 3. Ch. 19 Safe, efficient, reliable, cost-effective and sustainable infrastructure facilities and services are used by the population
 - In terms of the top 3 chapters with most number of baseline data
 1. Ch. 10 Human capital development accelerated
 2. Ch. 8 Economic opportunities in agriculture and fisheries
 3. Ch. 19 Safe, efficient, reliable, cost-effective and sustainable infrastructure facilities and services are used by the population and Ch 11 vulnerability of individuals and families reduced
 - In terms of the top 3 with target data:
 1. Ch. 8 Economic opportunities in agriculture and fisheries
 2. Ch. 10 Human capital development accelerated
 3. Ch. 19 Safe, efficient, reliable, cost-effective and sustainable infrastructure facilities and services are used by the population

Table 5. Region III summary of provincial RM indicators

3.4. Region IV-A

With a total of 391 indicators, 41% are aligned with SDGs, 85% have baseline data with only 72% having targets (Table 6). The top 3 PDP chapters with indicators are

1. Ch. 10 Human capital development accelerated
 2. Ch. 8 Economic opportunities in agriculture and fisheries
 3. Ch. 19 Safe, efficient, reliable, cost-effective and sustainable infrastructure facilities and services are used by the population
- The top 3 chapters with SDG aligned indicators:
 1. Ch. 10 Human capital development accelerated
 2. Ch. 20 Ecological integrity ensured and socioeconomic condition of communities improved
 3. Ch. 19 Safe, efficient, reliable, cost-effective and sustainable infrastructure facilities and services are used by the population and Ch. 8 Economic opportunities in agriculture and fisheries
 - The top 3 PDP chapters with baseline data are
 1. Ch. 10 Human capital development accelerated
 2. Ch. 8 Economic opportunities in agriculture and fisheries

3. Ch. 19 Safe, efficient, reliable, cost-effective and sustainable infrastructure facilities and services are used by the population.
- The top 3 PDP chapters with baseline data are
 1. Ch. 10 Human capital development accelerated
 2. Ch. 8 Economic opportunities in agriculture and fisheries
 3. Ch. 19 Safe, efficient, reliable, cost-effective and sustainable infrastructure facilities and services are used by the population. Ch. 20 Ecological integrity ensured and socioeconomic condition of communities improved and Ch. 5 People centered, clean, efficient, and effective governance ensured

3.9. Region VIII

As mentioned above, Region VIII created their own chapters, which explains the different numbers in Table 11. However, to continue the analysis, the Region VIII chapter titles (reported in Table 11) were matched with the PDP Chapter titles in the discussion below.

With a total of 528 indicators, 31% are aligned with SDGs, 95% have baseline data with only 86% having targets (Table 11). The top 3 PDP chapters with indicators are

1. Ch. 10 Human capital development accelerated
2. Ch. 8 Economic opportunities in agriculture and fisheries
3. Ch. 19 Safe, efficient, reliable, cost-effective and sustainable infrastructure facilities and services are used by the population

- The top 3 chapters with SDG aligned indicators:
 1. Ch. 19 Safe, efficient, reliable, cost-effective and sustainable infrastructure facilities and services are used by the population
 2. Ch. 10 Human capital development accelerated
 3. Ch. 8 Economic opportunities in agriculture and fisheries
- The top 3 PDP chapters with baseline data are
 1. Ch. 10 Human capital development accelerated
 2. Ch. 8 Economic opportunities in agriculture and fisheries
 3. Ch. 19 Safe, efficient, reliable, cost-effective and sustainable infrastructure facilities and services are used by the population.
- The top 3 PDP chapters with baseline data are
 1. Ch. 8 Economic opportunities in agriculture and fisheries
 2. Ch. 10 Human capital development accelerated
 3. Ch. 19 Safe, efficient, reliable, cost-effective and sustainable infrastructure facilities and services are used by the population. Ch. 20 Ecological integrity ensured and socioeconomic condition of communities improved and Ch. 5 People centered, clean, efficient, and effective governance ensured

3.10. Region IX

With a total number of 431 reported indicators, 36% are aligned with SDGs, 72% have baseline data with 63% having targets (Table 12). The top 3 PDP chapters with indicators are:

1. Ch. 19 Safe, efficient, reliable, cost-effective and sustainable infrastructure facilities and services are used by the population
 2. Ch. 10 Human capital development accelerated
 3. Ch. 8 Economic opportunities in agriculture and fisheries
- The top 3 chapters with SDG aligned indicators:
 1. Ch. 19 Safe, efficient, reliable, cost-effective and sustainable infrastructure facilities and services are used by the population
 2. Ch. 10 Human capital development accelerated
 3. Ch. 20 Ecological integrity ensured and socioeconomic condition of communities improved
 - In terms of the top with most number of baseline and target data
 1. Ch. 10 Human capital development accelerated
 2. Ch. 19 Safe, efficient, reliable, cost-effective and sustainable infrastructure facilities and services are used by the population
 3. Ch. 18 Security, public Order and safety ensured and Ch. 8 Economic opportunities in agriculture and fisheries

3.12. Region XI

With a total number of 189 reported indicators, 43% are aligned with SDGs, 96% have baseline data with 86% having targets (Table 14). The reason that there appear to be more baseline and target data than indicators could possibly be because of incorrect/incomplete filling up of the RM template by leaving the 'indicator source' column blank. The top 3 PDP chapters with indicators are

1. Ch. 19 Safe, efficient, reliable, cost-effective and sustainable infrastructure facilities and services are used by the population
 2. Ch. 10 Human capital development accelerated
 3. Ch. 11 Vulnerability of individuals and families reduced
- The top 3 chapters with SDG aligned indicators:

1. Ch. 10 Human capital development accelerated
2. Ch. 19 Safe, efficient, reliable, cost-effective and sustainable infrastructure facilities and services are used by the population
3. Ch. 11 Vulnerability of individuals and families reduced
- In terms of the top with most number of baseline data
 1. Ch. 19 Safe, efficient, reliable, cost-effective and sustainable infrastructure facilities and services are used by the population
 2. Ch. 10 Human capital development accelerated
 3. Ch. 11 Vulnerability of individuals and families reduced
- In terms of the top 3 with target data:
 1. Ch. 19 Safe, efficient, reliable, cost-effective and sustainable infrastructure facilities and services are used by the population
 2. Ch. 10 Human capital development accelerated
 3. Ch. 8 Economic opportunities in agriculture and fisheries

3.16. NCR

With a total number of 106 reported indicators, 10% are aligned with SDGs, 96% have baseline data with 66% having targets (Table 18). The top 3 PDP chapters with indicators are:

1. Ch. 8 Economic opportunities in agriculture and fisheries
 2. Ch. 7 Philippine culture and values promoted
 3. Ch. 5 People centered, clean, efficient, and effective governance ensured
- The top 3 chapters with SDG aligned indicators:
 1. Ch. 8 Economic opportunities in agriculture and fisheries
 2. Ch. 7 Philippine culture and values promoted
 3. Ch. 9 Economic opportunities in industry and services expanded
 - In terms of the top with most number of baseline and target data
 1. Ch. 7 Philippine culture and values promoted
 2. Ch. 8 Economic opportunities in agriculture and fisheries
 3. Ch. 5 People centered, clean, efficient, and effective governance ensured

4. Case Analysis of Regions 1 and 10 Results Matrix Accomplishments

The next important step in utilizing the drafted RMs is establishing how these were used, if they were, in monitoring progress. Out of the 87 provinces and NCR LGUs that drafted a results

matrix, a total of 44 submitted accomplishment s reports for 2018 with only 37 doing so in 2019. Oversight agencies should be stricter in enforcing LGU compliance if this reform will be continued.

To highlight the usefulness of accomplishment reports, this section presents shows how the information gathered from the RM can be used through an analysis of the accomplishment reports of Regions 1 and 10. Bottomline, complete and compliant submission of RM accomplishments would help (1) monitor progress in priority areas; and, (2) identify areas where national government oversight agencies could also provide assistance.

For Ilocos Norte, Table 19 shows that in both 2018 and 2019, 56% of RM indicators were reported to have accomplishments. The majority were in human capital (Ch. 10), followed by infrastructure (Ch. 19) and agriculture and facilities (Ch. 8). For 2018, 70% of the accomplishments reached or exceeded RM targets while the rest did not. In 2019, majority of the accomplishments (51%) fell short of the targets. The number of accomplishments that reached targets decreased for all PDP Chapters except for those on (1) people-centered governance (Ch. 5); (2) industry and services (Ch. 9); (3) macroeconomic environment (Ch. 15); and (4) just and lasting peace (Ch. 17).

For Ilocos Sur, Table 20 shows that in 2018 accomplishments were greater than RM indicators (due to incorrect filling up of RM template). The province was, however, able to hit 81% of their targets. These were clustered in agriculture and facilities (Ch. 8), human capital (Ch. 10) and industry and services (Ch. 9) and. In 2019, accomplishments were in 92% of RM indicators though these fell short of 84% of these targets. Agriculture and fisheries (Ch. 8) and industry (Ch. 9) remained with the most number of accomplishments along with the shift to infrastructure (Ch. 19) in 2019. From 2018 to 2019, the achievement of target accomplishments decreased for all PDP Chapters except for human capital (Ch. 10).

For La Union, Table 21 shows that accomplished RM indicators declined from 40% in 2018 to 26% in 2019. The majority of accomplishments in were in agriculture and facilities (Ch. 8), human capital (Ch. 10), and (1) people-centered governance (Ch. 5). In 2018, 94% of the accomplishments reached or exceeded RM targets while the rest did not (6%). In 2019, majority of the accomplishments (59%) fell short of the targets. The number of accomplishments that reached targets decreased for all PDP Chapters except for those on: Philippine culture and values (Ch. 7); industry and services (Ch.9); human development (Ch. 10); technology adoption (Ch. 14); and, sustainable infrastructure facilities and services (Ch. 19).

For Pangasinan, Table 22 shows that there was an improvement in terms of the accomplishment of RM indicators from 8% in 2018 to 14% in 2019. The majority were in agriculture and fisheries (Ch. 8), human capital (Ch. 10), gains from demographic divide (Ch. 13) and by infrastructure (Ch. 19). For 2018, 55% of the accomplishments reached or exceeded RM targets with an increase to 74% in 2019. Accomplishments improved with an increase in the number of

those that reached targets for agriculture and facilities (Ch. 8) and gains from demographic divide (Ch. 13) but declined for human capital (Ch. 10).

Misamis Occidental submitted an accomplishment report only for 2019 (Table 23). The province claimed that 184 indicators had accomplishments⁶ in the areas of vulnerability of individuals and families (Ch. 11), infrastructure (Ch. 19) and agriculture and facilities (Ch. 8). Another caveat is there were achieved indicators that did not have any indicated targets, these

⁶ This number, however, exceeded the number of RM indicators explaining the more than 100% accomplishment. The incorrect filling up of the template is a common occurrence and should be addressed moving forward with this policy direction.

were counted in the total number of accomplished indicators but categorized as ‘did not reach target.’ As a result, 53% of the accomplishments fell short of targets.

For Lanao del Norte, accomplishments of RM indicators declined from 57% in 2018 to 34% in 2019 (Table 24). The majority were in agriculture and facilities (Ch. 8), infrastructure (Ch. 19) and vulnerability of individuals and families (Ch. 11). In 2018, only 35% of the accomplishments reached or exceeded RM targets improving in 2019 to 51%. The number of accomplishments that reached targets increased for all relevant PDP Chapters except for those on (1) vulnerability of individuals and families (Ch. 11) and ecological integrity (Ch. 20).

Looking at the summary of the different provinces, policymakers can see that the different provinces, and, consequently regions, have different priority areas. These provinces also perform differently in terms of achieving their targets. For example, Region 1 and 10, similarly prioritize agriculture and fisheries. In contrast, the other major priority of Region 10 provinces are vulnerable individuals and families while Region 1 is human capital development.

Among the provinces within a region, there are those that similarly perform in terms of reaching targets like in Region 10. In Region 1, Pangasinan was the only province that improved in hitting targets from 2018 to 2019. This kind of information and analysis would be very helpful in identifying policy or interventions by oversight agencies.

5. Perceptions on the implementation of the PDP Localization exercise

Key informant interviews were conducted with LGU and DILG officials of 4 provinces and 2 NCR LGUs. The results showed majority of those interviewed believed in the relevance of creating provincial/NCR results matrices. These were perceived to be useful tools in identifying priority areas for investment as well as for monitoring and evaluating progress.

In terms of the implementation, the interviews revealed that workshops were initiated by the DILG and NEDA with the purpose of informing provinces regarding this policy and how this was to be rolled out. Some provincial governments applied operational strategies such as several planning meetings to be able to strategically implement this policy. Some provinces did another round of localization exercises out of their own pockets.

With regard to lower level LGU participation in the PDP localization exercise, cities and municipal representatives were claimed to be present for some provincial workshops. In some cases, they were present just to be informed of the activity. However, one province interviewed took a more active role seeking inputs of lower level LGUs which they claimed few LGUs submitted inputs.

Several of the interviewed local government and planning officers as well as DILG provincial and regional focal persons expressed that, because they see the value of the RMs in development, these should be institutionalized by integrating in the development planning processes. Several local government officers suggested that RMs be institutionalized in the development planning process so that this would not be perceived as a separate task but endemic to the planning process. One provincial LGU official suggested that the implementation of the Mandanas ruling be the point of recalibration of all CDPs/CLUPs/LDIPs across the country.

One of the concerns commonly raised was how the activity was an additional task that needed to be taken on by limited human resources. One of the suggestions was to assign or identify the officer responsible for drafting the RM in each LGU. In addition, the interviewees expressed the need to provide related technical capacity building programs. Another suggestion that surfaced at an interview with provincial LGU representatives was to streamline the process of drafting an RM, and lessen the burden on manpower, was to make the indicators aligned with AIP reference codes. Finally, a couple of those interviewed perceived the exercise to be an imposition on

LGUs, encroaching their fiscal autonomy, which could perhaps be because of previous experiences with national government funded PPAs.

6. General Findings and Recommendations

The results matrix is a powerful tool that could help identify priority areas, monitor progress in these areas, collectively inform strategic investments, and surface areas that LGUs may need oversight support from the national government.

In general, the study found that:

- The PDP localization exercise was well received and is believed to be a useful tool in identifying priority areas of provincial/NCR local governments which also represent their contribution to national development.
- There is a demand for the drafting of provincial/NCR results matrices to be institutionalized and integrated as part of the local development planning process.
- From the point of view of the national government, the RMs show areas where technical or capacity-building or even budgetary support could be given by oversight agencies to local governments
- Ensuring the correct completion of such in the future will improve the use of the RMs as monitoring tools.

In evaluating the RM indicators, the study found:

- About 37% of the indicators, on average, were aligned with SDGs
- The PDP priority areas identified based on the number and proportion of indicators were the chapters on (1) human capital development (Ch. 10); (2) economic opportunities in agriculture and fisheries (Ch. 7); (3) safe, efficient, reliable, cost-effective and sustainable infrastructure facilities and services (Ch. 19); and, (4) ecological integrity and socioeconomic conditions of communities improved (Ch. 20).
- A limitation to the approach in this study is that it could not be discerned if the high concentration of indicators of PDP chapters was due to strong prioritization or because there are more data/indicators in these areas of human development, agriculture and fisheries, infrastructure and ecological balance. The impression though is that it be the latter.

Recommendations/Moving forward:

- Institutionalize the drafting of results matrices with local development planning:
 - Implementers suggested that this exercise become an institutionalized part of the local development planning process. In drafting the comprehensive development plan, it must have results matrices that identify priority areas and it should be linked to the local LDIP which was absent in the current RMs. The DILG should continue the 2019 effort mentioned in the introduction of creating a BLGD-RM code. Adding BLGD-RM codes (which the DILG define over the PDPs' intermediate goals, sector and sub-sector outcomes and sub-sector outputs) to the LDIP will match the Annual Investment Program (AIP) reference codes used in

planning and budgeting to PDP outputs and outcomes. This would help track the contribution of LGUs to Philippine development through their (RM coded) PPAs.

- There must be capacity building activities that emphasize the need to correctly accomplish/draft the RMs to facilitate both the review process of RMs and its appreciation and comparison/consolidation with other LGUs/regions and the nation.
- Data plays a vital role:
 - The lack of baseline data could be indicative of the absence of data on RM indicators. NG oversight agencies could play a role in ensuring LGUs have updated and consistent data perhaps through the implementation of the Community-Based Monitoring System (CBMS) Act which provides assistance in the conduct of the CBMS prioritizing poorer LGUs (Sec. 11).
 - As for the evidence of fewer target indicators, oversight agencies or higher level LGUs could be stricter in this requirement to elicit commitment from LGU officials with respect to targets.
 - One of the suggestions was to assign codes to indicators that were consistent to the AIP reference codes to minimize the additional time needed to classify/categorize data indicators.
 - There is also a need to create an information system for it to be easier to monitor progress. The plan to implement an electronic e-LDIP system, mentioned in the introduction, is a step in the right direction. Combining this with the plan to implement BLGD-RM codes discussed above would enhance monitoring.
- Information dissemination and education could be improved since some LGUs believed the exercise was for the national government to impose their priorities on local governments. The exercise should be presented as a way of recognizing the contribution of LGUs to national development. It should be clearly conveyed that the adoption of PDP/RDP indicators are only for those relevant to the LGU.

It should be made clear with the local governments that these initiatives are not mere compliance to international agreements and commitments and that this exercise promotes harmonization of international, national and local development plans. The national government may consider to provide incentives to LGUS, that such integration will benefit the local governments. Moreover, the Philippine government can learn from the international best practices of those countries who have committed to adopt SDG goals in their local development planning.

- Human resource requirement: Several of the LGUs expressed that the challenge is that there is limited manpower and capacities for LGUs to take on this additional task. Others suggest to streamline it so as not to be perceived as an additional task. If the drafting of an RM will be integrated in the development planning process, it could be tasked to the local development council and the municipal planning team.
