

Assessment of the Service Capability and Readiness of Philippines Hospitals to Provide High-Quality Health Care

Terence John M. Antonio, MD, MBA
Medical Officer IV

Health Facility Development Bureau

Republic of the Philippines
Department of Health

HEALTH FACILITY DEVELOPMENT BUREAU

Boosting
Universal Health Coverage

Key Point of the Study

1. There is a large gap in the implementation of standards across ownership type (DOH, LGU, and Private)
 - a. Standardization of Care and Protocols
 - b. Non-utilization of quality and efficiency indicators of Hospitals
 - c. Non-systematic target Management

1. Revisit the M&E framework for Quality

Shifting Program Directions for Developmental Standards

Ensures the implementation of standards and guidelines aimed to improve efficiency and effectiveness of health care services

1. Expand Scope
2. Expand Tools
3. Innovate Program Delivery

Strategies of IHOMP and Future Direction

IHOMP Strategic Focus

Strategy 1:

Ensure easy access to references and capacity building for health facility standards through innovative platforms (ie Web-based standards, e-Learning, eBooks).

Outcome:

DOH standards are updated and readily available to all health facilities.

Activities:

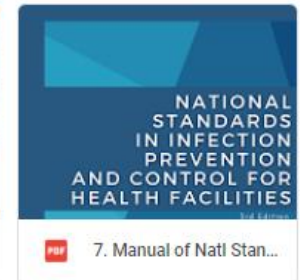

Conversion of Manuals to eBooks (ePUB or Web-based); movement to e-Learning platform through the DOH Academy.

Strategies of IHOMP and Future Direction

IHOMP Strategic Focus

Strategy 2:

Enable good governance and evidence-informed policy decision-making in hospital operations through the use of an iHIS for the collection, processing and submission of health and health-related data and reports at all levels of data processing.

Outcome:

Evidence-based decision making for hospital operations.

Activities:

Harmonizing data collection for compliance to standards.

Provide inputs in the development of Health Information Systems

Strategies of IHOMP and Future Direction

IHOMP Strategic Focus

Strategy 3:

Streamline monitoring and evaluation activities through innovations to facilitate the use of hospital operations related data to steer regional and national level decision making, policy development, and planning.

Outcome:

Standards are adopted for both government and private hospitals.

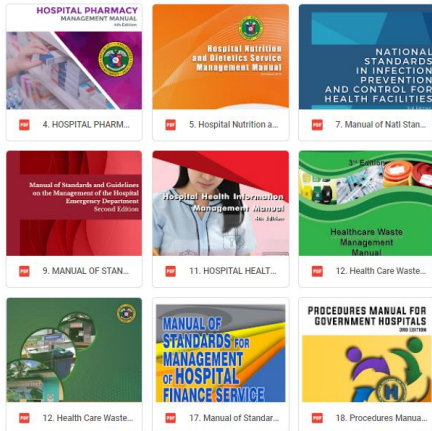

Activities:

Expansion of scope with other hospital information systems to adopt DOH Standards.

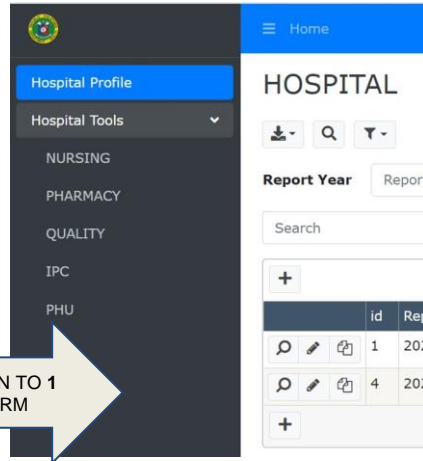

Where are we right now?
